

Your Bi-Monthly e-Update from Food Quality Labs, Inc.

Lead in Non-food Products

Over the past year the media has been buzzing about the presence of lead in non-food products, particularly some items imported from China.

If you are considering importing from China, Food Quality Labs has the capability to test for lead in toys, paints, etc. Call us at 503 297-3636 to discuss your specific needs.

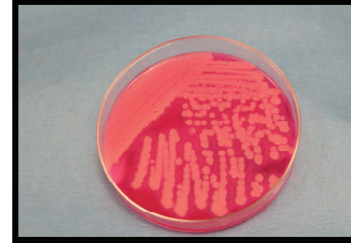

Another Helper

In our quest to continuously add to and upgrade our capabilities, Food Quality Labs is pleased to announce that Michelle Fudge-Snow has joined our team.

She will be working with Jade in the Microbiology Department. Michelle comes to us with extensive experience in microbiological testing and has hit the road running.

When you talk to her, welcome her aboard. She is excited about getting to know how best to serve you.

August-September 2008

What you don't want to see in your product

Newsletter Spotlight

In case you didn't know, Food Quality Labs has certification for potability testing of drinking water in both Oregon and Washington States.

So if you have a drinking water supply that needs a certificate of potability in either state, we can provide it.

Quality Control Mission

Quality Control is important for all of us. We want to provide safe foods as well as process foods according to USDA, FDA and other regulating agencies' requirements.

At Food Quality Labs, we are passionate about our procedures and systems to ensure the testing we do for our clients is superlative.

- Whenever we receive new supplies, the lot code and the date of receipt is recorded for EVERY lot.
- We run positive and negative controls on EVERY lot of test kits, media, sterile bottles, etc., and those results are recorded.
- We monitor and record equipment temperatures to ensure proper environment for samples and supplies are maintained at all times.

Our clients can verify that we contact them immediately when we see something unusual with their test results so that they can quickly resolve any issue.

As our tagline says, we want to protect your quality name.

Thought for the month

Remember that in almost every case, the more disciplined you are, the more successful you'll be.
